

CUT AND PASTE BUILDER KIT

Our cut and paste builder kit has been designed to allow you and your school to design your own unique climbing frame using our Freeflow system.

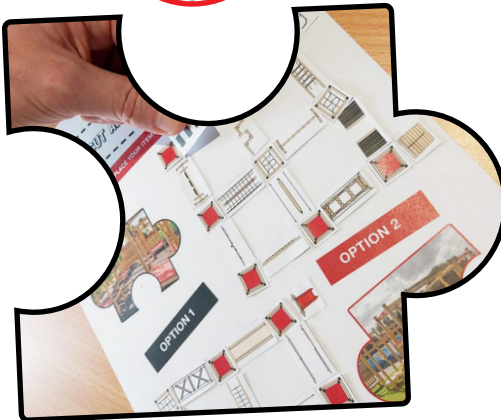

STEP 1

Download and print out this cut and paste builder kit, and distribute to your pupils.

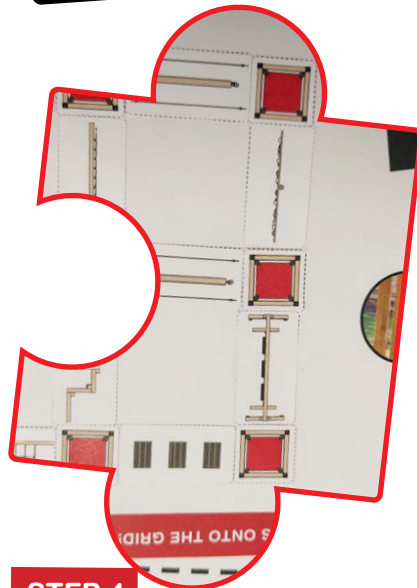

STEP 2

Carefully cut out the components

STEP 3

Loosely place your items onto the pre-designed grid.

STEP 4

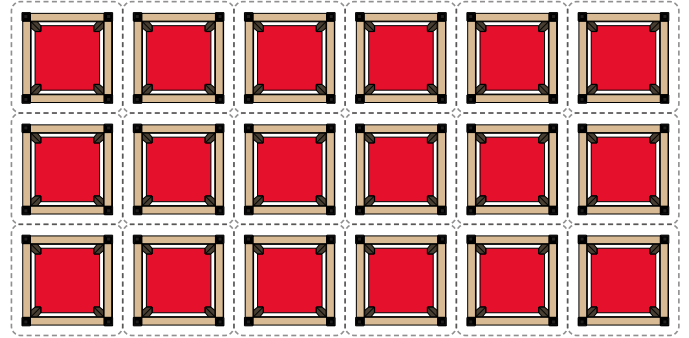

When you have a design that you like, try sticking down the components so they stay in position.

FINAL STEP!

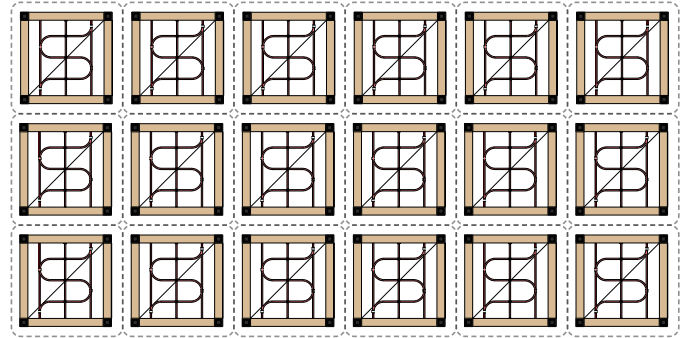

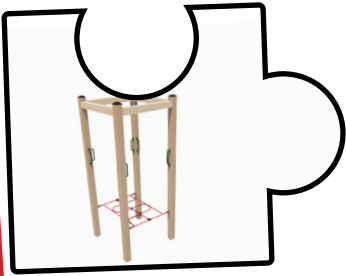

Send your designs back to us and we can give you a quotation for your design.
